

# SharePoint Deployment Planning Services

*Plan for an effective deployment of Microsoft  
Office SharePoint Server*

## Business Context

- Are you considering a Microsoft Office SharePoint Server 2007 deployment? Need a roadmap or plan of action?
- Do you have business issues that can be addressed by the deployment of Business Productivity Infrastructure?
- Are you looking for a way to offset the costs of doing a SharePoint Deployment Planning engagement?

## Solution Benefits

- **Get more value** from your Software Assurance investment, **at no additional cost to you.**
- Acquire an engagement **customized to your needs** (Collaboration, Portals, Search or Enterprise Content Management)
- SharePoint deployment services provided by a **qualified SDPS certified partner**
- Burntsand will **share best practices**, analyze your organizational environment, and provide tools and services that help with your SharePoint deployment

## Key Products

- Microsoft® Office SharePoint® Server 2007
- Microsoft® Windows SharePoint® Services v3.0
- Microsoft® Office Enterprise 2007/Microsoft® Office Professional Plus 2007
- Microsoft® Office PerformancePoint™ Server 2007
- Microsoft® SQL Server™ 2005 database platform
- Microsoft® Windows Server 2003 / 2008

**SharePoint Deployment Planning Services (SDPS) are designed to help your organization plan an effective deployment of Microsoft Office SharePoint Server.**

As part of your Software Assurance benefits, you can receive vouchers that can be redeemed for services. Burntsand will use field proven business and technical guidance to conduct a 1, 3, 5, 10 or 15-day programmatic planning session.

This program provides best practices and well defined results, including a broad range of planning tools and services that help optimize the effectiveness of Microsoft Office SharePoint Server's core capabilities and help lower the cost of deployment and improve the productivity of your organization. Depending on voucher redemption value, some of the services you are eligible for include:

- ✓ A Strategy Briefing that defines the vision for achieving technical and business goals is part of all engagements.
- ✓ An Architectural Design Session which introduces SharePoint technologies, solutions and concepts in a 3 day engagement.
- ✓ A Deployment Planning Session to cover a specific SharePoint capability in depth in a 5 day engagement.
- ✓ A Proof of Concept to demonstrate the solution in your environment in 10 or 15 day engagements.

SDPS gives you a roadmap to help your organization plan an effective deployment of Microsoft Office SharePoint Server, and reduce the risk and cost of planning for a SharePoint deployment. It includes a broad range of planning tools and services that help lower the cost of deployment and improve the productivity of your organization.

Implementing SharePoint can provide your business the following benefits:

- ✓ Increased personal productivity
- ✓ Streamlined processes and more effective content management
- ✓ Improved business insight across the business
- ✓ Better connections between people and the information and expertise they need
- ✓ Simplified organization-wide access to both structured and unstructured information across disparate systems

**Let Burntsand help ease the process of planning for your SharePoint implementation and deployment.**
